

# COMPREHENSIVE SERVICE OFFERINGS

(transform IT with an expert guide)

## **IT challenges go beyond technology**

Many of the most complex IT challenges are not created by technology alone. They're acts of integration, tests of collaboration, challenges of process design, and feats of risk reduction. In these cases, hardware and software can't do it alone. To solve the most vexing challenges in IT, you need to bring people, processes, and technologies together as one.

## **Bringing IT all together with us**

At Veristor, we leverage years of experience to architect solutions that can truly transform and accelerate your business. The experts behind our services are constantly striving to make IT work for you by deploying technologies that fit seamlessly into your budget and operation, ensuring your data is well protected and working tirelessly to prevent and overcome costly infrastructure issues.

See how our expertise is the key that unlocks IT performance for you.

# A COMPLETE END-TO-END SERVICES LINEUP

Expertise that covers the entire IT infrastructure lifecycle

## Design and Deployment

Expertise that connects the dots, integrates applications, and makes your whole IT ecosystem work better and move faster. Veristor deployment experts receive extensive training and certification from our many software and hardware technology partners, helping us drive performance, interoperability, and compliance across your end-to-end IT architecture.

## Professional Services

Goes beyond the usual rack, stack, and wire approach to ensure that your solutions are well architected and fully integrated – every time. Our talented implementation team can stay with you until your staff has the real-world knowledge and end-to-end documentation it needs to successfully operate your new system.

## Managed Services

Fortifies your business through a suite of managed offerings that help you deliver full IT resiliency. Veristor's white-glove advisory approach brings best-practice behaviors together with best-in-class solutions to stop attacks, secure data, actively monitor infrastructure, and immediately respond to incidents as they happen.

## First Call Support

Accelerates the path to issue resolution with a best-in-class managed technical support service available 24/7/365. With Veristor's First Call Support service, you'll get an advocate with an inside track who can troubleshoot, diagnose, and resolve technology issues quickly and painlessly.

## Support & Software Renewals

Keeps track of software licenses, hardware parts replacement, and technical support contracts so IT teams don't have to. We help implement consolidated asset-tracking systems that help simplify the process, alerting staff before contracts expire and ensuring that important services continue without disruption or unnecessary costs.
